DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Yamada discloses an apparatus for improving fluoroscopy image quality and reducing signal noise (Yamada: column 1, lines 7-11). This apparatus comprises a "two-dimensional radiation sensor array formed of photoelectric conversion elements for outputting charge signals corresponding to an amount of radiation" (Yamada: figures 1 and 8, column 8, lines 29-32, wherein the two-dimensional matrix is the matrix of 1000x1000 elements), "switches arranged in a matrix form under the radiation sensory arrays and connected to the photoelectric conversion elements" (Yamada: column 8, lines 32-34, wherein the switches are the TFT's which are arranged under each of the photoelectric conversion elements, thus putting them in a matrix form), "a gate driver circuit connected to the switches for turning on the respective switches in case of readout out the signals" (Yamada: column 8, lines 34-35, figure 8, item 45), and "a readout amplifying circuit connected to the sensor arrays for readout of the charge signals" (Yamada: figure 8, item 47, wherein the readout amplifying circuit is the initial stage integration amplifiers). However, this apparatus lacks the TV reference signal circuit, picture signal superimposing circuit, and digital to analog switching circuit as claimed by Takemoto. This apparatus further lacks the specific connections as claimed and seen in figure 1 of Takemoto. A further search was conducted which failed to yield any prior art. Therefore, the prior art

fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
